# Sustainability Strategy

- **Strategy:**

At Hi-P, we see sustainability as the foundation of long-term growth.

We are committed to **reducing our climate impact, building resilient and responsible supply chains, advancing the well-being of our people and communities, and upholding ethical governance.**

Through these efforts, we strive to create shared value for all stakeholders.

- **Pillars:**

**Climate  
Action**

**Responsible  
Supply Chain**

**People &  
Community**

**Ethical  
Governance**

# Sustainability Target

- **Net-zero Sustainability Targets:**
  - **By 2026, we targets a 5% decrease in carbon emissions compared with 2025.**
  - **We commit to using 70% renewable energy by 2027 and achieving carbon neutrality in our own operations by 2030.**
  - **By 2050, we pledge to reach net-zero emission across our entire value chain.**

# 2025 Target & Performance Review - SZ

## Suzhou Net-zero Sustainability Targets:

- **By 2026, we target a reduction of 1260 tCO<sub>2</sub>e (5%) in Scope 2 carbon emissions compared with 2025**

## Suzhou 2025 Performance:

- **In 2025, the photovoltaic power generation amounted to 1,451,910.09 kWh, the green certificate volume reached 15,861,000.00 kWh, and the total renewable energy accounted for 35%.**
- **Compared with 2024, Scope 2 emissions reduced by 2568 tCO<sub>2</sub>e, equivalent to a 9% decrease.**
